

JUNG

A creation

Transparent beauty in
the shape of a square

Transparency with Format

The A creation range provides a convincingly clear design as well as exclusive materials. In the coloured glass version, the frames provide for transparent airiness on walls: Elegant black,

silver (mirror finish), red, blue-grey, and discrete soft white provide accents here. The combination with matching inserts in white, aluminium or black completes this light, airy appearance.

aluminium

white

black

The A creation concept also integrates design versions using high quality duroplastic material. The colours white, aluminium and black provide accents in any room – whether a private household or commercial building. Whether office or living room, doctor's office or bistro, hotel suite or youth's room: The square switches from the A creation range provide modern lifestyle and airiness in an elegant manner with any type of furnishings.

Design and Functionality

A creation is more than just a clear design; it also provides a maximum variety of functions. The areas of light, radio, temperature and blind management, as well as KNX technology are completely covered.

Push-button sensor

The KNX push-button sensors enable the operation of lighting, heating and blinds control. Light scenes or central ON/OFF functions can also be realised.

Automatic switch

The device switches light or other loads depending on detected movement in the required areas.

Fingerprint system

This identification system permits access for indoor areas only for selected persons.

Modular Jack socket

This data socket is suited for the installation in network with a transmission from 100 up to 250 MHz.

The JUNG Radio

The JUNG Radio for flat wall-mounting installation convinces due to the high-quality tone and great loudspeaker dynamics thanks to the integrated bass reflex enclosures – equipped with an A creation frame for an elegant appearance.

Flat wall-mounted transmitter

Of course all devices of the Radio Management can be combined with the design range A creation.

Blinds Management

The centre plate for motor control is available in a radio-controlled version or with “anti lock-out” function.

Timer thermostat display

The desired temperature for every room and at the right time. Please select your individual settings.
